

A Cutting-Edge System with Decades of Heritage

Razorback Auto-Level 550

A cutting-edge system with decades of heritage

Incorporating revolutionary technology*, Razorback Auto-Level 550 is the next generation rotary hedgecutter with a smart self-levelling Co-Pilot device that delivers increased productivity, a superior finish and significant cost savings.

With its 1.5 metre wide head and a 5.5 metre reach, Razorback is at home with all types of verge mowing and hedge cutting tasks, and can easily tackle two to three-year-old growth. Highly versatile, this robust machine combines efficiency, power and reach which makes it appealing to farmers and agricultural contractors alike.

Head and shoulders above the rest

Featuring a 1.5 metre head fitted with three four-blade rotors on a vertical axis, Razorback's revolutionary technology* is backed by decades of industry knowledge and a proven track record in innovation. The unique design means the blades are in contact with the growth during their entire 360° cycle, awarding a much faster and cleaner cut and a superior mulching technique. The rotary action and side deflectors ensure that the debris is efficiently contained by the hood with considerably less material throw onto the road or the tractor cab.

As well as the 1.5 metre head width, Razorback boasts a 5.5 metre reach, the combination of which enables users to top and side hedges in fewer passes whilst leaving a highly professional finish at double the output.

The front hood and the rear roller are hydraulically adjustable, making it easy to adapt to different stages of growth.

The rotary head is lighter and has a lower power and maintenance requirement compared with its conventional flail counterparts, making Razorback a more efficient and cost effective choice.

Smart self-levelling Co-Pilot system

Razorback features revolutionary Auto-Level Co-Pilot technology* which ensures that the head and the main frame of the machine remain level at all times, irrespective of the tractor angle in relation to the undulating ground. This unique feature awards an exceptionally smooth finish regardless of the terrain, making for a more comfortable and trouble-free experience.

Operation is simple and precise thanks to Razorback's electronic proportional controls which incorporate a 3-axis joystick. The main control box features rotor on/off, level sensitivity and Auto-Level Co-Pilot on/off functions.

High specification as standard

With a 1.5m rotary head, Auto-Level Co-Pilot technology* and advanced proportional controls included as standard, the Razorback's high specification offers exceptional value, making it a highly desirable choice all round.

Razorback Auto-Level 550	
Advanced Controls	
Electronic Proportional Controls	Standard
Auto-Level Co-Pilot	Standard
Mounting	
Rear 3-Point Linkage	Standard
Rear 3-Point to 4-Point Hitch Stabiliser Kit	Standard
Armset	
Parallel Arm Geometry	Standard
Head	
SoftStart Triple Rotor c/w Additional Mulching Blades	Standard
Hydraulically Controlled Front Hood	Standard
Hydraulically Controlled Rear Roller	Standard
Hydraulics	
Horsepower	68HP
System Type	Gear
Pump Type	Cast
Oil Tank Capacity	220 ltr
Oil Cooler	Standard
Totally Independent Hydraulic System	Standard
Hydraulic Upgrades	
Angle Float Kit	Optional
Lift Float Kit	Optional
Safety Equipment	
LED Road Lighting Kit	Standard
Safety Breakaway	Standard
Power Slew	Standard
Tractor Requirements	
Minimum Tractor Weight	3,500kg
Minimum Tractor Horsepower	85HP
Specification	
Reach	5.5m
Head Cutting Width	1.5m
Weight (including the 1.5m head and 220 litres of oil)	1880kg
Retail Price	
Standard specification including 1.5m head c/w hydraulic rear roller and electronic proportional controls	£28,480.00

Prices exclude VAT & Carriage
